6	**NoelleGannon\Module Survey - Essay** **Applied in other fields** **Did you feel that the methods learned were relevant to other courses and can be applied in other fields ?**

Answer	Participant ID	Details	Group	Date
Yes, useful in my field of study. Techniques learned in this can be applied to my other areas of study.	Anonymous		N	Feb 16 2011
I can see how the course material is relevant to my degree course as a whole. However, the content so far is almost if not exactly the same as the content of the 2nd year PDE's course (MP204-Mechanics Sem 2). MP204 is compulsory for 2nd year Maths Physics and MP364 is compulsory for 3rd year Maths Physics, and although I'm sure the course content is extremely important and relevant for this subject, it seems a bit redundant to study the some thing twice. Answer	Participant ID	Details	Group	Date
Michel is an excellent lecturer who tries to involve everybody and provides a refreshing approach to maths physics. Much more interesting than previous maths physics modules I have taken because of this.	Anonymous		N	Feb 16 2011
